The Home Intercom that's Serious about Security: Introducing the Linear VMC1 Video Security Intercom

Combines Live Video, Home Automation Control & Communication in One Package

Carlsbad, CA (May 7, 2012) – Winner of the 2012 SIA New Product Showcase 'Best In Residential & Monitoring Solutions' Award at ISC West in March, the new [VMC1 Video Security Intercom](#) from [Linear LLC](#) is serious about security. It is the one residential system that combines intercom, live video and basic home control, giving homeowners multiple communication and security features in one efficient package.

Ideal for medium to larger-sized homes and smaller commercial businesses, the new Intercom and accessories offer functions that far exceed basic door-to-video screen entry systems:

- *Integrated video security* – Up to three color video camera stations allow users to view activities inside and out from the master unit, any TV screen, or via a snapshot or video signal sent to a smart phone or computer monitor.
- *Home security via smart home control* – Users can turn lights on or off remotely or automatically; see when doors are left open; remotely close a garage door or activate an alarm system panic alert.
- *Intercom communication and monitoring* – The system enables users to speak to a single room, a group of rooms or the whole house (up to 20 rooms). One or more rooms can also be monitored or kept private.
- *Whole-house music* – The VMC1 supplies exceptional sound quality and volume levels for rooms of all sizes using three-inch, 16 ohm speakers. An AM/FM radio is integral to the system, with inputs for an MP3 player.

For more information about the VMC1 Video Security Intercom, contact your Linear sales representative, visit www.linearcorp.com, or call 1-800-421-1587.
