

e³
SERIES Product Overview Sheet

Subject: E3-Series Extended Warranty

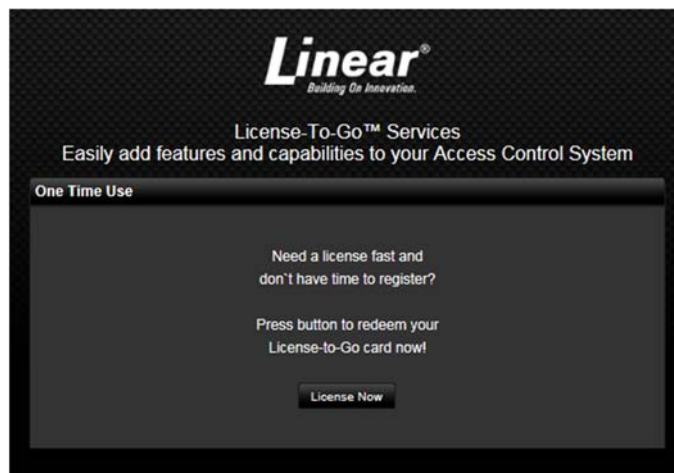

Overview: The E3-Series extended warranty license moves the standard product warranty length of time to 5 years. This extension to the standard warranty covers the hardware and any major update to the software that is released while under warranty.

Note: The warranty applies to only one module or panel. If the system contains 3 modules then an extended warranty license needs to be purchased for each module in order to cover the entire system.

Our standard terms of the warranty policy applies to this extension:
<http://www.nortekcontrol.com/pdf/WarrantyRepairPolicy.pdf>

Prior to registering, each panel is validated through its **MAC address** and **manufacturer's activation date**. Each panel must be registered prior to the standard warranty expiring.
